

PURIS®

PURIS® Pea FlowBev Protein

PURIS® FlowBev Protein has all the functionality expected from PURIS® Pea Protein, but is designed with maximum flowability in mind. Reduced electrostatic charge improves efficiencies, reduces clumping, and increases throughput making it the ideal PURIS ingredient for beverage customers. Improved capillary action gives FlowBev Protein excellent hydration capabilities and the uniform particle structure contributes reduced dustiness for less waste and a better user experience.

Product available as:

	GROWN IN THE USA		MADE IN THE USA		CERTIFIED USDA ORGANIC	
	DAIRY-FREE		GLUTEN-FREE		KOSHER	
	MADE WITHOUT SOY		GLYPHOSATE RESIDUE FREE		PLANT-BASED	

PURIS® Pea FlowBev Protein

FEATURES

Uniform particle structure, improved hydration, and a clean neutral taste. 80% protein by weight.

BENEFITS

Product flowability reduces clumping and clogging, which increases throughput. Reduced static, dustiness, and waste improves efficiency and user experience. Lower density gives end users improved volume perception.

APPLICATIONS

PURIS® Pea FlowBev Protein is the ideal ingredient for dry beverage blends. Design for flowability, its properties ensure more consistent results in manufacturing and a better experience for end users.
